CareAparent Helps Small Businesses Reopen

Home Care Company Provides Complimentary Skilled Nursing Screening for Local Companies

SAINT PAUL, Minn. – April 30, 2020 – CareAparent, an independent and locally owned licensed home care provider, values and understands the tremendous pressure small businesses face as the pandemic continues to re-shape Minnesota’s employment and industry. To help businesses open quickly, efficiently, and with peace of mind, CareAparent is offering a skilled nurse COVID-19 screening at no cost to employers within the Twin Cities metro area with 25 or fewer employees. Employers will be offered the back-to-work screening program at their place of employment on a first-come, first-serve basis.

“The goal of this program is to allow CareAparent’s team of dedicated nurses to assist employers in meeting state standards for COVID-19 in the effort to return-to-work,” said Tracy Farley, Director of Nursing at CareAparent.

On April 23, 2020, Minnesota Governor Walz signed Executive Order 20-40, which allows the re-opening of certain non-critical businesses. CareAparent nurses will conduct an on-site COVID-19 screening. The screening can be scheduled as early as Monday, May 4th, if employers meet qualifying requirements. CareAparent’s screening program will continue until the end of May 2020 or until all 30 open employers’ spots have been filled.
